Cross-Cutting Training Forum

Problem

DOE and its contractors needed a tool to identify training needs and opportunities for sharing existing resources across the DOE complex.

Baseline Technology

DOE sites independently identified and developed site specific training resources.

Innovative Technology

The INEEL-developed Cross-Cutting Training Forum is a web-based tool that allows cooperative development and avoids redundant efforts at multiple sites.

Comparison

The Cross-Cutting Training Forum allows development of training products which can be used throughout the complex.

Benefits

This training forum enabled the INEEL Site Wide Landlord Operations project to reduce training costs. Cost avoidance for FY 2000 was approximately \$48K.
